Gradients and surfaces

The signature rule

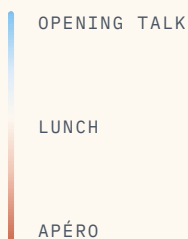

A 6 px band directly beneath the hero. It is the one piece of pure brand colour on the page, and everything else in the system is derived from it.

```
background: linear-gradient(90deg,
  #7EC3F1 0%, #DCEBF9 26%, #FDF8F0 46%, #F0C4B2 70%, #CC6B4F 100%);
```

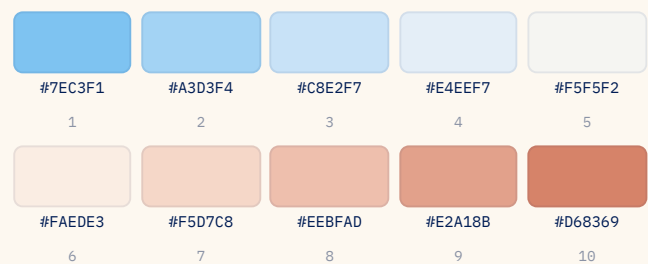

Turned vertical: the programme rail

The same five stops at 180° form the 2 px rail down the agenda, which is why the programme sits on a navy band. On cream the two pale stops disappear.

Sampled for labels

Each agenda item takes the rail's colour at its own point, sampled from 0 % to 92 % so the final label still clears 4.5:1 on navy.

The mesh panel

Used for the audience and contact panels: four soft radial gradients over sky-pale, blurred. Sized in container units so it scales with the panel.

```
background-color: #DCEBF9;
background-image:
  radial-gradient(circle at 65.34% 44.62%, rgba(253,248,240,1) 0%, rgba(253,248,240,0) 34.1%),
  radial-gradient(circle at 28.07% 74.48%, rgba(240,196,178,1) 0%, rgba(240,196,178,0) 45.65%),
  radial-gradient(circle at 52.42% 19.94%, rgba(126,195,241,1) 0%, rgba(126,195,241,0) 57.55%),
  radial-gradient(circle at 80.31% 84.47%, rgba(220,235,249,1) 0%, rgba(220,235,249,0) 69.1%);
filter: blur(0.4cqmin); /* inset: -0.8cqmin to hide the blurred edge */
```

How they divide the work

Literata	Anything that names something: headings, card and session titles, speaker names, tier names, fact values, the intro lede. Never used for running text.
Karla	Anything read as a sentence: body copy, bios, descriptions, navigation, buttons, footnotes.
IBM Plex Mono	Anything that acts as a tag: eyebrows, chips, speaker roles, agenda formats, fact labels, prices, the status line. Always uppercase and letter-spaced, never below 11px.

section headings `clamp(1.65rem, 3vw, 2.25rem)` and the intro lede

Fact label on cream	 #8B93A5	 #FDF8F0	2.91:1	below AA

Three pairs sit below 4.5:1. The terracotta eyebrow (3.43:1) and the button label (3.41:1) pass only as large text, and both are small. The fact label `--text-faint` at 2.91:1 fails outright. If you want the page fully AA, darken the eyebrow toward `--rust-deep` `#7A3620` and the fact label toward `--text` `#4A5462`.

Motion

Card hover	<code>translateY(-2px)</code> , warmer border
Pulse ring	<code>2.2s cubic-bezier(.2,.6,.3,1)</code> , infinite

Under `prefers-reduced-motion` the pulse stops, smooth scrolling is off and transitions collapse to 0.01ms.

Focus and skip

Focus ring: 2px `--rust`, 3px offset, 4px radius. A skip link parks off-screen and lands top-left on focus, navy on cream.

Images
